DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/12/07 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 41-52 are rejected under 35 U.S.C. 102(e) as being anticipated by Gammenthaler (2004/0201765).

Gammenthaler, in Figures 1-4, discloses an in-car digital video recording using the same method of operating a vehicle-mounted surveillance system including a camera and vehicle-mounted recording device that creates video recordings having a start time and a stop time as specified in claims 41-52 of the present invention, comprising capturing a stream of real time video of an area of surveillance using the

camera 10; processing the real time live video stream by imposing a surveillance system-imposed delay of pre-set time interval on the live video stream to generate a time-delayed video stream (e.g. 21); wherein the delay that is imposed is in addition to any delays caused by latency and other time-delays inherent in electronic devices that process video streams for a purpose other than imposing a delay (i.e. operator reaction time); and activating the recording device 52, upon an occurrence of an event at a reference time, to record the time-delayed video stream so that a video recording is created of the surveillance area and the start time of the video recording precedes the reference time by the pre-set time interval.

With respect to claims 42-52, Gammenthaler also discloses the pre-set time interval is user-adjustable value between 5 to 10 seconds (e.g. officer reaction time).

Response to Arguments

4. Applicant's arguments with respect to claims 41-52 have been considered but are moot in view of the new ground(s) of rejection.
